LOADING TWO GRAIN CARS A MINUTE IN RECORD CANADIAN NATIONAL MOVE

DELIVERIES of grain to the lakehead by the Canadian National Railways during September just closed exceeded the combined deliveries of September, 1924, and 1923, according to grain figures issued at Winnipeg on Oct. 1st, 18,913 cars were delivered during September, 1925, against 4,651 in September, 1924, and 12,656 in the same month of 1923. The daily average for September, 1925, was 630 cars against the previous record of 322, established in September, 1923.

New records were made by the Canadian National in other branches of the grain movement also. Marketings during the month were 52,207,000 bushels against the previous high mark of 39,770,000, made in September, 1923. Loadings were 27,878 cars and 37,217,000 bushels during the month compared with 22,508 cars and 28,472,000 bushels in September, 1923. Total loadings on Canadian National lines to the end of September this year were 29,284 cars and 39,033,000 bushels, against 11,079 cars containing 14,632,000 bushels at the same date last year.

On several days toward the end of the month, loadings reached from 1,400 to 1,500 cars per day, which during the ten-hour working day required the loading of approximately two and a half cars per minute in order to reach this total. Reducing the time to seconds it was estimated that at least 60 bushels of grain (the contents of a farmer's wagon box) were loaded into a car on Canadian National Western lines every second during the ten-hour working day.

The heaviest week of the season by four million bushels in grain marketings closed on Oct. 1st. Loadings for the week were heavier than any previous week since the opening of the grain season by 1,200 cars or nearly one million bushels. Compared with statistics for the same period last year, the week's marketings

were just twice those of 1924, while the loadings were larger by 3,837 cars, or 4,253,000 bushels.

A record week was also experienced at the lakehead, when 6,149 cars of grain were unloaded and 60 boats, carrying 13,292,000 bushels, were cleared for eastern markets. During the same week last year only 2,208 cars were unloaded and 29 boats, carrying 5,806,000 bushels, were cleared.

Canadian National loadings for the week by provinces were: 3,486,000 bushels in

Manitoba; 6,970,000 bushels in Saskatchewan; 1,571,000 bushels in Alberta; making a total of 10,475,000 bushels, or 8,580 cars, for the period.

Marketings at C.N. points were: 4,167,00 bushels, Manitoba; 11,825,000 bushels, Saskatchewan; 2,220,000 bushels, Alberta; total, 17,568,000 bushels. This leaves in store at midnight Thursday in country elevators in the three provinces in the order given above: 2,649,000, 12,734,000 and 1,972,000 bushels, a total of 17,355,000 bushels in storage as compared with 6,579,000 bushels at the same date last year.

The movement west is speeding up also, as threshing progresses in the western districts, 417 cars having arrived at Vancouver during August and September. This is just 201 cars more than during the same two months last year.

British Journalists Give Impressions of Canada

Having completed a ten-thousand-mile tour of Canada from coast to coast and return at the invitation of E. W. Beatty, chairman and president of the Canadian Pacific Railway, ten British journalists representing papers from London, Western England, Wales, Glasgow and Belfast, now broadcast to Canadians their views of the Dominion. These journalists were asked to come to this

R. A. COLWILL,
Western Morning
News, Plymouth.

"Canada has given me a true appreciation of what is meant by great open spaces. The possibilities of this vast country are enormous, and you have as yet barely scratched the surface of its wealth. It is a land which offers great opportunities to men of the right type, but this great Dominion is obviously a young man's country, and one where every man must work. You ask no questions as to his antecedents. You merely ask him to carve out his own career. You take a man for what he himself is worth, not for what his father was. In such a land a man who is a man can work and be happy."

W. D. RENTON,
Daily Chronicle,
London.

"Canada's supreme confidence in her future greatness has made a deep impression upon me. Only men possessed of great vision and almost overpowering energy would have laid so soundly and on such comprehensive lines the foundations which we have everywhere seen for the coming of a great civilization. The nobly planned parliament buildings, the ambitious university institutions, the network of railways, harbor facilities, vast water powers, electricity schemes, irrigation works, and cities planned out on princely lines, have been conceived for a great to-morrow. Canada is shouldering financial and other burdens in this task of Empire building which call for sympathy and admiration. It is the white man's burden in the world. One stands amazed that so few people should have accomplished so much in so short a time which encompassed Canada's history."

JAS. F. CHAPTER,
Westminster Gazette,
London.

increase if those whose chief desire is get rich quick and quit."

CAPT. E. ALTHAM,
C.B., R.N.,
Morning Post,
London.

Canada's growing exports and imports is becoming better appreciated. (6) Canada is a land where men must be men indeed, no wasters, agitators, or traitors to King, Flag and Empire, need apply. That is my predominant impression."

F. G. R. PETERSON,
Times, London.

Dominion, to refute baseless charges against its own good name, to make known to the young men of our own country the splendid opportunities that await them, in short, so far as lies within our power, to tell the Motherland the truth about Canada."

country to study at first hand the economic, commercial, industrial and agricultural conditions of the Dominion and to thus enable them to meet and combat from their own knowledge the misunderstanding and misrepresentation of Canada and Canadian conditions that have been prevalent in the Old Country of late months. Their trip was an unqualified success from every point of view. The impressions follow:—

H. S. READ,
South Wales News,
Cardiff.

"Canada is not a country but a continent boundless in rich resources and richer still in the indefatigable energy of a people whose most conspicuous social characteristics is their devotion to education and research, in wise foresight of the future. For its development the great requirement is population, which can best be supplied by co-operative action of home and Dominion authorities in training would-be immigrants for agricultural work. Training is an essential requisition to rescue men and women from unwilling idleness in the Old Country and put them within reach of the abundant opportunities of the New land is to transform them from conditions of penury into sharers of exhaustless wealth, and in so doing to strengthen the Empire. We are greatly indebted to the Canadian Pacific Railway for their invitation to make the tour."

HUGH MARTIN,
Daily News, London.

"Canada's need is the Old Country's opportunity. Equally Britain's is the new country's opportunity. From the Atlantic to the Pacific seaboard I have heard the cry, 'Send us men; send us capital,' and have found conclusive proof that once again the new world has the power to redress the balance of the old; have we and have you the will to make that power effective? It seems to me to be largely a matter of understanding and sympathy. Patriotism is not enough, but translated into terms of mutual help I know is capable of leading us both into a new promised land. Let us pull together."

JOHN A. BUIST,
Glasgow Herald.

"Every province of Canada claims that it is the land of opportunity. I believe that each is entitled to make that claim and that the opportunity is for more people who are willing to work primarily on the land and are determined to succeed. The vast open spaces must be populated. As a Scotchman who has met many old countrymen on this wonderful tour via the Canadian Pacific Railway across the Dominion I should like to see a large influx of immigrants belonging to the race which played such a noble part in the pioneer work in the land of promise for the young and vigorous. The Old Country can still produce that type. What prevents them from coming? They lack the means, not the desire. I believe that if our home government and the Dominion Government could agree to assist them to a greater extent than has hitherto been done, the main obstacle to the flow of Scottish immigration into Canada would be removed. The people must be found, if not from the Old Land then taken from elsewhere, but I think you would prefer the old stock."

CHAS. J. JORY,
Daily Telegraph,
London.

"I became more and more impressed with the boundless possibilities of this great Dominion every day of my tour. From Halifax to Vancouver that impression grew from wonder to amazement. Surely for a man who will work and for the woman who will help him there is no land so rich in resource, so full of opportunities. All honor, then, to the brave men who made this possible, to the pioneers who blazed a nation's way through brush and canyon, who adventured over river and lake and prairie, and to the Canadian statesmen whose vision was not that of ordinary men."

JOHN SAYERS,
Belfast Telegraph.

"Canada fills me with wonder and admiration. That a comparatively small population should have accomplished so much in so short a time is marvellous, and from what I have seen I am convinced that the tapping of the Dominion's resources, particularly of Alberta and British Columbia, has only begun. If the two urgent needs of men and capital—British if possible—can be supplied, there seems to be no limit to the future of the country. I am impressed by the loyalty, the beauty, and the pluck of Canada, and I take off my hat to the courage of the early explorers and settlers. They laid foundations upon which it should be an honor to be to-day Floreat Canada."

EXPERIMENTAL

FARM NOTES

At the Dominion Experimental Farm at Scott during the season of 1925 386 pounds of tomatoes were ripened on the vines before the first killing frost, 997 pounds of well advanced tomatoes were picked green many of which were ripened inside in a few days.

The method of growing was to plant the seed in boxes in the hot-bed about April 12th and reset about three inches apart when an inch or two high. When four or five inches high raise the glass gradually for a greater time each day and later take boxes out of the bed for a while each day thus hardening the plants to the weather. After all danger of frost is past transplant to the garden placing the plants one yard apart the ground that only about one fourth of the plant is above the ground. The plants are often beginning to bloom before they are transplanted to the garden. All of the branches are kept pruned off and only the main stem is allowed to grow and this is tied up to a stake so that the tomatoes are off the ground and exposed to the sun.

When visiting the farm in summer be sure to see the tomatoes growing.

A good story is being told against a famous champion of prohibition in the North.

He is a man with a very pronounced stutter. Not long ago he went on a walking tour with a friend and called at an inn for refreshment, naturally ordering a strictly non-alcoholic drink.

"Ah," said the man after his first long draught, "this ginger beer is very good. Let's have another."

And he called for another round of the same drink.

But when the barman came to collect the price, both friends were astonished at the amount charged, and said as much.

"Oh, no," said the barman, "that's not dear; you asked for 'gin-'n- ginger beer, didn't you?"

Here and There

It is understood a Scottish syndicate has purchased sixteen acres of land adjoining the best residential section of Vancouver, B.C., and will erect one hundred residences there.

Although only three years old the Oliver district of British Columbia has already become noted for its production of very fine cantaloupes. This year the production is expected to be about 25 to 26 carloads.

The 1,250,000-bushel Government Terminal grain elevator being built at Prince Rupert, B.C., will be completed by November 1st, when a test shipment of ten carloads of grain will be made through it.

Notification has been received by the Hon. John S. Martin, Minister of Agriculture for Ontario, that his showing of white Wyandottes at the New York State Fair at Syracuse, had captured the trophy for the best display for the twentieth consecutive year.

By a recent Order-in-Council of the Lieutenant-Governor, premiums for clearing land, which had previously been set at \$6 an acre, were increased to \$8. The Order also provides that the premium will be paid for a maximum of twenty acres of land and, as a result of it, a settler may obtain a grant of \$160 from the Government as a reward for his work.

Considerable progress has been made during the past few years by R. M. Palmer, at Cowichan Bay, B.C., in the cultivation and propagation of new species of gladioli. In his garden, Mr. Palmer has at present growing about 150 different varieties, bulbs having been secured from all parts of the world, even Central Africa contributing its quota to this wonderful collection.

Having completed their tour of Canada as the guests of E. W. Beatty, chairman and president of the Canadian Pacific Railway, the ten British journalists left Canada early in October for England, to relate there the story of their experiences and to give their readers the impressions they have gained of the Dominion.

New Canadian Prima Donna

This is Miss Loretta McEwen, soprano, chosen out of a hundred Canadian competitors, as possessing the greatest possibilities for an operatic career. With her is Captain Clews, of the Canadian Pacific liner Melita. Miss McEwen is on her way to Paris to study her art, under Madame Pauline Donalda, world-famed songstress.

The competition in which Miss McEwen was successful, was held recently in Montreal. Voices from all over the Dominion were heard by Madame Donalda, who adjudicated.

Miss McEwen possesses a soprano voice of great range and power, is a good actress, well educated, speaks French and Italian fluently and is conversant with Italian and Spanish. Madame Donalda has expressed the opinion that there is a great career before the young singer.

Miss McEwen is the daughter of Mr. William McEwen, of Montreal. On her father's side the descent is Scottish. Her mother's is French. "I hope I shall bring credit to Canada," she said to friends seeing her off on the Melita, which will sail for Paris.

A school teacher said to her class of boys:—

"I am going to give each of you three buttons. You must think of the first as representing Life, the second Liberty, and the third Happiness. In three days I want you to produce these buttons, when I shall expect you to tell me what they stand for."

On the appointed day she asked one of the boys for his buttons.

"I ain't got 'em all," he said. "Here's Life, and here's Liberty, but mother has gone and sewed Happiness on my pants."

**IS THE REST ROOM
A CURE FOR
MAILORDERITES?**

By A. Y. Armour

The viewpoint of the lady from Fayban on the above question as given in the Chronicle issue of September 16th was an interesting one, and held a good deal of truth, particularly in regard to the dependence of the small town upon its country custom, and also the anaemia consequent upon ignoring this basic fact. But I venture to differ with her as to what is the particular cause which sends the country customer hurrying home to 'send away an order. Mrs. Armstrong says, "No restroom where she can await Friend Husband getting through his rounds." but as I see it, even if given a rest room at every corner to 'park' in she will still be subject to 'mailorderitis' if local prices, in her opinion, are far too "steep" in comparison with catalogue figures. Especially is this so with the farm woman who must sell her butter and eggs at 'going' prices (mostly downwards) and pay in return the 'peak' prices for the goods she buys. To offer her a restroom to soothe her suspicions is like putting healing salve on an angry boil.

The resentment which grows out of a situation of this sort cannot be kept down by a plethora of restrooms. These merely become useful as a place wherein to discuss the "soaking characteristics" of the small town in question. She may even use its writing equipment to send off that inevitable order, but as a sop to her resentment it fails to appease her. She may in an odd case, go home and write out a mail order to Timothy Eaton, because the local merchants have been thoughtless enough not to build a restroom for her to wait

in while Friend Husband makes the 'giddy' round of poolroom, hotel, blacksmith's shop, or livery barn as enumerated by Mrs. Armstrong,—but in an overwhelming number of other cases she has had to do it in self defence, she had to stretch her dollar to the best advantage. Simply that and nothing more, is at the root of this mailorder mania (so called) amongst the farmers. And without doubt the local merchant who senses this fact, and adjusts his ideas on profit most nearly to fair play, need spend no time pondering whether he had better build a restroom to 'hold' the country custom. I am free to say that some of our local merchants are showing signs of having seen a light in this respect. I say this in fairness to those of them who look on the mail order house not so much as an enemy as a factor to keep in line with, but don't let anything I have said give them the impression that the time has come for them to rest on their laurels! Excelsior is the word!

But perhaps the most regrettable result of this mutual distrust is the reaction it has upon our unity as a community. Having to order by mail robs both sides of the personal contact which means so much in the ironing out of our common problems. With resentment busy on both sides there is small chance of either side getting together to do something 'big' for the district or themselves.

A half hearted accomplishment is the logical outcome of petty ill feelings and misunderstandings between the workers.

It is sometimes remarked that

the town has no use for the country districts except for "extraction" purposes so why should we support it.

On the other hand we hear of an urban type which classes all farmer folks variously as mossbacks, rubes, or hayseeds, they, themselves presumably being the aristocracy, so to speak. They are but the Western examples of that snobocracy, commenting on which Robbie Burns said—

"The man o' independent mind he looks—and laughs at a' that' And this being the West, we can laugh even more than he, for here real aristocracy is a matter As for the party who says, "We don't need a town we can get on all right without one,"—is he not the same chap whom we hear yelling his head off because his 'repairs' are taking too long to come from the city? Yea, ver-

ily, there is no pleasing of him! Both types are detrimental to goodwill between town and country, but neither are they so common as to injure much beyond their own circle of thinkers if goodwill is established by the means best calculated to coax back the coy confidence of the buyer.

Vote for J. A.
and the Hudsons Bay

To The Electors
of South Battleford Constituency

UNITY, SASK., 30th September, 1925

The Federal Election is being held on the 29th of October, next, and it will be the privilege and duty of the electors to cast their ballots for a candidate to represent them in the Federal Government at Ottawa.

I have the honor to be the choice of the Conservative Convention which was held on the 29th of September and, as such, appeal to you for your support. I will lay my past record as a Canadian born citizen of 25 years residence in Western Canada upon the altar of public opinion and let you be the judge as to whether I can satisfactorily represent you in the next House of Parliament. I farmed for eight years in Manitoba successfully and was educated in the school of economy. Since taking up my residence in Unity in the fall of 1908 a large portion of my time has been devoted to public affairs. Served in the capacity of organizer of the first Board of Trade and was President for eight years. Organized the Unity Agricultural Society and worked in its interests for eleven years. President of the Unity Co-operative Creamery and was largely responsible for the building of it. Served on first Hospital Board of the original Hospital of Unity. Was first president of the Unity Rural Telephone Company and served for four years. This is now one of the largest rural telephone lines operating from one central office in Western Canada. Have held positions continuously for fifteen years on Advisory Boards of local organizations, was Mayor of the Town of Unity for two years and am President of the local Red Cross. I believe that those who know, will say that the foundations of these organizations were well and truly laid, and feel that you will agree with me that the experience gained through connection with these activities is of some value. During my residence at Unity I have acquired considerable farm lands, and to-day practically half of my time is devoted to directing the work and cultivation duties on these farms, which comprise 65 per cent of my holdings. My greatest care is to bring these farms to the highest degree of production and to market the crop to the best advantage. All of the crop, both wheat and coarse grain, is sold through the Saskatchewan Co-operative Wheat Producers Ltd. I think you will agree that your interests are my interests, and my desire would be to fight for the interests of Western Canada, for my only business is farming and dealing with farmers in this Constituency.

The many promises of support that have come to me unsolicited from Liberals and Progressives in different parts of the district are most gratifying, and are indicative of the fact that the old idea of parties reforming the men is out of date and we must have men to reform the parties. What Canada needs most, at the present time, is sound, economical, co-operative government that will give us results, not promises, and then we need have no fear of our future success. I assure you, if you send me to Ottawa as your representative, I will return to you prepared to give an account of my stewardship and I further assure you that it will not be a zero.

Yours Respectfully,
J. A. HAGERMAN.

Famous Soprano in Montreal

This is Miss Rosa Ponselle, famous soprano of the Metropolitan Opera New York, photographed at Windsor Station, just before she left Montreal by Canadian Pacific train, after giving her first Canadian concert in His Majesty's Theatre, Montreal. Miss Ponselle is perhaps the greatest dramatic soprano now on the stage, although she is yet well under thirty years of age. Her sister, Carmela Ponselle, is also a star in the New York Metropolitan House.

SHERLOCK LADIES AID

The usual monhaly meeting was held on Saturday October 3rd at the home of Mrs. Claus Luthje. There was a good attendance of members. The principal business was the Sale of Work which it was decided to hold on the 30th of October in Sherlock School. At this event there will be attractions for all and it is hoped that a record attendance will assist the ladies in paying for the Organ which they have placed in the school. A dance will follow with the Mathieson, brothers in charge of the music. Don't forget to keep this date well in mind, and be on hand to get some of the good things. Admission will be 50c for gents. Ladies will please bring baskets, otherwise they will be charged the admission fee. The club held tn informal dance. The weather was unfavorable, but cleared later, and the attendance was, under the circumstances, exceedingly good. The music was all that could be desired, the floor in excellent shape which made the evening one of vim and enjoyment for those who delight in dancing. After paying expenses a small balance was left to enable the ladies to carry on their good work.

The good ladies of the Fram district have also formed a ladies Aid. The last meeting wvas held on Thursday last at the home of Mrs. Lavold. A fair attendance of members discussed many matters of importance, and it wa's decided to hold the next meeting in a month's time at the home of Mrs. Thorson.

B. C. CATTLE FOR CHINA

The first shipment of purebred cattle from Vancouver to Southern China left the coast recently, when thirty head of stock from the Fraser Valley district started on the long journey to Shanghai. The animals were purchased by a large dairy concern in the Orient.

Quality

The most urgent requirement in Canada's Agricultural Products

CANADA produces every year large quantities of wheat, oats, barley, butter, cheese, bacon, beef, eggs, apples, potatoes, grass seed and clover seed that she cannot consume. Her natural outlet for these products is, of course, Great Britain—the one great consuming country of the world with an open market.

Unfortunately, nearly every other country with any surplus of food products seems to want to send its surplus to this same market.

The keenness of the competition on this, our only market, and the energy and resourcefulness of our competitors began to impress themselves upon the Department of Agriculture some time ago, but it is only within very recent years that the real and only way to grapple with this problem has been discovered, or at least put into effect. This Department now believes, as do also most of the farmers of this country, that the "grading" of our agricultural products is the policy and practice that is seeing us through the struggle and will assure us of our rightful place on the British market.

"Grading" means the classifying of products, whether they be hogs, butter, cheese, eggs or anything else, into what might be called in a general way "BEST", "GOOD", "FAIR" and "POOR" classes.

These exact words are not used in describing the grades, but that is what is meant. The purpose served in grading is threefold—

(1) Educational. When the producer sees the relative quality of his product he is spurred on to maintain that quality if it is the "best" or to improve the quality where necessary.

(2) Fair Play. When products are not graded the inferior article for various reasons often brings as much as the superior article, and the credit and advantage of putting the superior product on the market is lost to the one who really deserves it.

(3) Facilitating Trade. The dealer learns to have confidence in the article he is buying and buys more freely, because it is guaranteed by grading, and gradually everybody gets to know what the "best" article really looks like or tastes like. In short, grading brings about standardization and ensures to the producer the best price.

Canada now grades her cereals, grass seeds, hay, potatoes, apples, eggs, butter, cheese, wool and bacon hogs. The results have been in every case beneficial and in some cases quite markedly so, even though the grading system has been in effect in some cases for only two or three years, thus:—

Cheese—Grading began April 1st, 1923. Canadian cheese the year before had fallen into such disfavour on the British market that New Zealand cheese was quite commonly preferred. Today Canadian cheese commands cents per pound higher than New Zealand.

Butter—Grading began same time as for cheese. The reputation of our butter was then indeed at low ebb. Canadian butter today, while not the best on the market, is rapidly improving in quality and gaining in reputation.

Hogs—Over two years ago the Department of Agriculture began to grade live hogs at the packing houses and stock yards. The 10% premium paid by the packers for "select" bacon hogs as against "thick smooths" as classed by departmental graders has done wonders to improve the quality of our hogs and develop the bacon industry.

Best Canadian bacon, which ordinarily was quoted two years ago from 10 to

18 shillings a long hundredweight below Danish, has gradually grown in the estimation of the British wholesale buyer until it is now quoted at only from 1 or less to at most 5 or 6 shillings per long hundredweight below the best Danish.

This improvement in price is, of course, due to quality and has come about very gradually, the spread narrowing down by a shilling or two a month until now it is not at all a rare occurrence to see best Canadian selling on a par with the Danish article.

Eggs—Canada was the first country to grade and standardize eggs. These grades and standards apply not only to export, interprovincial and import shipments, but also to domestic trading.

The basis is interior quality, cleanliness and weight.

Standardizing Canadian eggs has established confidence between producer and consumer and between exporter and British importer, and has resulted in a greatly-increased demand for the Canadian egg both at home and abroad.

Other products might be mentioned where grading has worked to the great advantage of the producer and to the advancement of Canadian agriculture.

Already Great Britain recognizes our store cattle, wheat, cheese, eggs, apples and oats as the best she can buy.

It is for us to so improve our other products, particularly our butter and bacon, as to bring them also into this list of "the best on the British market" and consequently the highest priced.

Grading enabled us to do this for cheese, wheat, eggs and apples.

Grading is helping us to do it for butter and bacon.

Quality Counts

Quality is thus the first objective for the Canadian export trade, and, then steady, regular supply. It is along these lines the Department of Agriculture is working by educational methods, and the result of this policy is seen in the growing volume of Canada's agricultural exports. Look at these figures:—
